Non-Final Rejection

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

- Independent claim 1 recites "at least two shells (4, 5; 20, 21), which are rotatable around an axis (7, 8; 22)" and "wherein outer side walls (11; 24) of said shells (4, 5; 20, 21) define a triangular shape of the case (1; 18) in said closed position." Since in the first embodiment drawn from Figs. 1-9, the shells rotate around axes 7 and 8, respectively, they do not rotate "around an axis." Only in embodiment 2 drawn from Figs. 10-15, two shells rotate "around an axis." Furthermore, in the closed position only in second embodiment the outer side walls define a triangular shape; in first embodiment the outer side walls do not define a triangular shape. It is clear that the claim language used in claim 1 directs only to second embodiment shown in Figs. 10-15, not for the first embodiment. However, the numerals in parentheses in claim 1, which refer to both first and second embodiments. It renders indefinite. It is suggested that the numerals in

Art Unit: 2627

parentheses in claim 1, which refer to the first embodiment should be deleted from the claims. Corresponding deletion should also be done for claims 2-9 and 13-15.

- Claims 10-12 direct to the first embodiment, which cannot depend on claim 1; for claim 1 directs to the second embodiment. Claims 10-13 should be cancelled.

Allowable Subject Matter

3. Claims 1-9 and 13-15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is an examiner's statement of reasons for allowance:

- With regard to independent claim 1, a conventional case of disk commonly has two shells. However, none of prior art of record discloses that these two shells are rotatable around an axis between a closed position and an open position, wherein outer side walls of the shells define a triangular shape of the case in the closed position of the case.
- Applicant asserts; in this invention, the case is insertable into a loading slot of a disk drive or the like, whereby the ease will be automatically transferred from said closed position into said open position while inserting the ease into said loading slot without the need of any additional mechanical components or parts inside the disk drive (Specification, p. 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record in PTO-892 Form and not relied upon is considered pertinent to applicant's disclosure.
